(54) METHOD OF COMMUNICATING ABNORMALITY IN HEALTH OF RESIDENT

(57)Abstract:

PROBLEM TO BE SOLVED: To detect and communicate not only an emergency state but also abnormality, change and the like about an inherent health condition, as to the detection of health abnormality of a resident.

SOLUTION: In this health abnormality communication system 1 for the resident, a communication device 11 installed in a resident dwelling house 4 is connected to a center equipment 5 of a meter inspection and safety center 2. The communication device 11 detects using conditions of gas and city water in the resident house 4 based on meter inspection data in a gasmeter 12, a city water meter 13 and the like, the detected using conditions are compared with using patterns, in a healthy condition of the resident, of the gas and the city water reflecting a life pattern when the resident is healthy, and abnormality occurrence notification that the abnormality occurs in the resident is issued to the center equipment 5 and a cellular phone 30 of a predetermined communication destination, when the detected using conditions are separated from the using patterns in the healthy condition.
